

Waste not. Want not.

It's tough to find a diversity of skills which you can 'switch on' when you need them and 'switch off' when you don't...

When your resources are on the bench nobody wins. Isn't it time to fix it before it's too late and try something radically different?

Relying on contractors increases risk. Recruiting internally can kill your cost model. Managing your peaks and troughs is a balancing act that requires a lot of time and effort, ensuring that at any given moment you have the right levels and portfolio of skills available in-house.

Are you tired of walking a fine line and ready to walk on solid ground?

It's time to think beyond contractors and agencies and experience a new kind of approach. Our consistent and reliable skill set offering will leave you feeling so refreshed.

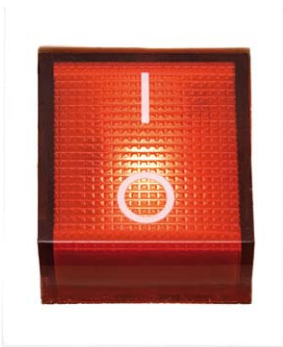

THINK BEYOND | THINK 6PM

FLEXIBLE RESOURCING

Think beyond the bench

Think 6pm

Here's how

Whether you are planning a new project, experiencing challenges delivering an existing one or are just short of a specific skill, 6pm have devised a consultancy model that brings the right combination of price, quality and flexibility to the partnership. It is something we have perfected through many years of experience in understanding precisely what each individual client needs. You are unique, and that makes you special.

We believe that our ability to understand your business requirements is as important as our technical knowledge. That is why we start by listening to your needs, your experiences and your challenges. Only then can we tailor our offering to exactly suit your needs. Sounds simple, but it's a promise we can deliver.

Our Quality procedures and exceptional SLAs, coupled with our competitive onsite/offsite rates means we become a powerful ally.

Each 6pm consultant is an IT professional with a passion for their work and the ability to contribute individually and as part of a team. We work with you the way you need us to: from deliverable-based projects and staff augmentation, to managed services. We also undertake work on Time and Material, Risk and Reward, and Fixed Price Frameworks. Our flexible structure allows you to utilise our expertise in the manner that best meets your needs. We can fit snugly into your wish list and keep providing results and assistance to help you meet your business objectives.

With a heavy investment in both time and money into every one of our customer relationships, we can promise you accessibility, understanding and flexibility like no one else. We can even offer trial periods at cost or FOC.

Whether you need to 'switch on' or 'switch off' the resources you need at any given point in a project life-cycle, our comprehensive portfolio of skills and experience are available to you whenever, wherever, however you might need them. It's a resource control feature like you've never known before.

We're unique too!

Our unique tools assist with the design of your applications and support the delivery of your solutions. Quick™ UI, our application prototyping tool, will radically accelerate the capture of requirements and significantly reduce the development cycle. So first we help you design the 'Right' Solution, then we help you to build it 'Right'.

IT and relationship experts.

**Call us and ask about Flexible Resourcing.
We'd love to chat.**
